

PICTURE PUZZLE

Technology Project

SUMMARY

The game Picture Puzzle is amazing. In this game you have an empty grid and then you fill it in with little squares. When you put all the squares together you make an excellent picture of an animal. For example, zebras, hamsters, foxes, and many more! In the game Picture Puzzle there are many levels depending on how big to small, and easy to hardest the grid will be.

A decorative graphic consisting of several parallel white lines of varying lengths, slanted diagonally from the bottom right towards the top right, located in the lower right quadrant of the slide.

TESTING AND EVALUATION

Testing out our game is very simple. How we will test this game is to put it online and let people test this out. After the views have played the game they will comment if they like it or hate it.
