

SERVES UP

HOW TO PLAY / PARAGRAPH

You're the volleyball chef and you have to take the customer's orders. When you take their order, you have to put your order on the rack for your cooks. When the food is finished, you "serve" the food to the customer. If you don't hit the right customer's table, or you throw it in the wrong place, you lose points. If you throw the food in the correct spot, you gain points. When you gain points, you can buy new chef suits, furniture, get power ups, and more ingredients to make new food. You also play challenges to gain your lost points because of unhappy customers. If you don't feed your hungry customers in time, they will leave your restaurant and you'll lose money. Make sure you always keep your restaurant organized.

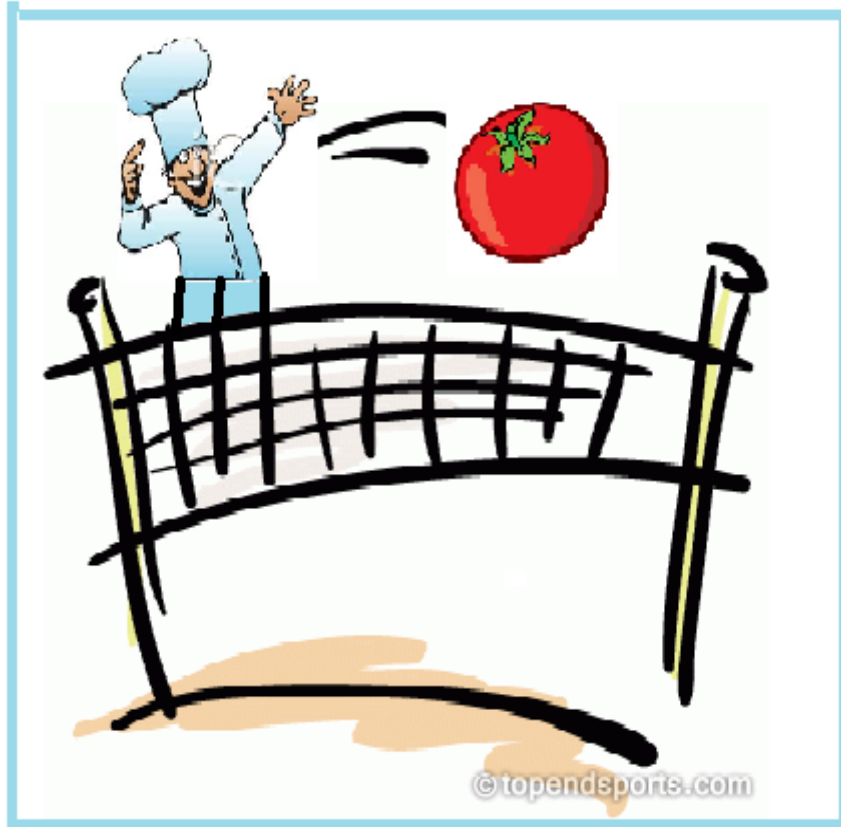

SLOGAN

You've just been served!
